PROFESSIONAL SUMMARY

Senior Mobile Engineer specialising in React Native, TypeScript, iOS and Android, with experience delivering creator-monetisation products, production observability and agentic developer tooling. Combines mobile-platform engineering, product analytics and full-stack web experience to improve reliability, developer effectiveness and commercial outcomes.

TECHNICAL SKILLS

Mobile: React Native, iOS, Android, React Navigation, Xcode, Android Studio, App Store, Google Play

Languages and Web: TypeScript, JavaScript, React, Node.js, Express.js

Architecture and Data: GraphQL, Apollo Client, Zustand, MMKV, REST APIs, MongoDB

Quality and Delivery: Jest, React Native Testing Library, Git, CI/CD

Observability and Analytics: Datadog, Amplitude, Hex, Statsig

Agentic Engineering: Codex, Claude Code, Devin, AI agents, developer tooling

Cloud: Microsoft Azure

WORK EXPERIENCE

[Linktree](#), Melbourne (Remote) | Jan 2022 - Present

Senior Software Engineer, Mobile (Dec 2025 - Present) | Software Engineer II (May 2023 - Dec 2025) | Software Engineer (Jan 2022 - May 2023)

- Lead delivery and operation of React Native applications across iOS and Android using TypeScript, GraphQL, Apollo Client, React Navigation and native platform integrations
- Deliver creator-monetisation experiences including native Digital Downloads uploads, paid messaging, commerce and subscription flows
- Build production observability across deep links, endpoint performance, release regressions and screen-level errors, using impact-based triage across client, network and backend signals
- Develop agent-accessible mobile tooling for route inspection, navigation, MMKV state, permissions and screenshots, alongside reusable testing infrastructure for complex messaging states
- Use Amplitude, Hex and Datadog to guide Android investment, mobile Earn strategy and subscription-reliability priorities
- Delivered a React Native tech talk that trained and enabled 60+ software engineers to contribute effectively to Linktree's mobile app ecosystem
- Ran mobile onboarding experiments that increased lifetime value by 50% and annual mobile subscription revenue by 10%
- Led the redesign of Linktree's mobile profile builder, improving the experience for creators curating and personalising their profiles

[GoodDogDesign](#), Adelaide | Mar 2021 - Dec 2021

Contract Software Engineer

- Delivered web and mobile applications for Australian and US clients using TypeScript, React, React Native and GraphQL
- Partnered with clients to translate product requirements into demonstrations, Jira delivery plans and production-ready features
- Reviewed code across Bitbucket and GitLab and released features through staging and production environments

[Platformers](#), Melbourne | Feb 2019 - Feb 2020

Junior Software Developer

- Built and maintained MERN-stack web applications and cloud databases supporting 100+ organisations and approximately 6,000 active users
- Designed Microsoft Azure cloud, serverless and automation solutions and integrated REST and SOAP APIs with internal and external systems
- Reduced Microsoft Azure DevOps costs by 40% through resource review and optimisation
- Built Azure-hosted APIs integrating partner services including Twilio and contributed to an enterprise application used by 100+ organisations

EDUCATION

Flinders University, Adelaide | Feb 2020 - Nov 2021

Master of Science (Computer Science)

GPA: 5.5

- Golden Key International Honour Society - recognised in the top 15% of high-performing students

Monash University, Melbourne | Jul 2014 - Feb 2018

Bachelor of Information Technology and Systems

- Represented Monash University at the Cyber Security Challenge Australia (CySCA), placing 13th out of 64 teams nationally
